PROJECTS

Bug Out | *.NET Core MVC, C#, Bootstrap, PostgreSQL*

- Web application using .NET Core MVC, PostGreSQL, and Bootstrap.
- Bug Out is a Bug Tracker/Issue Tracker where a company can manage tickets and projects. It also allows managing company members and their respective roles.

Cinemanage | *.NET Core, C#, Bootstrap, PostgreSQL*

- Web application using .NET Core MVC, PostGreSQL, and Bootstrap.
- Cinemanage is an application that retrieves real-time movie information through an API. Users can search for any movie and add it to their own lists and favorites.

Yellow List | *.NET Core, C#, Bootstrap, PostgreSQL*

- Developed a full-stack web application using ASP.NET MVC, PostGreSQL, and Bootstrap.
- Yellow List is a contact list app, which can be divided into categories for easy organization. It sends emails to your favorite contacts or to a specific group.
- Two-factor authentication to keep data secure.

Blog | *.NET Core, C#, Bootstrap, PostgreSQL, RESTful API*

- Developed a full-stack Blog using ASP.NET Core MVC, PostGreSQL, Bootstrap, and Javascript.
- The Blog is used to write about various topics related to software development.
- Includes a RESTful API to export the latest posts.
